

Rubric for reasons

- 40-50pts no use of notes, reasons are very understandable and descriptive of the class, **do not** sound canned, this score range should include close to the correct (within a pair switch) placing as well.
- 35-39pts no use of notes, average description of the class but are more scattered and harder to follow, harder to understand as far as volume and terminology,
- 30-34pts no use of notes, poor description of class, poor terminology, long pauses, has trouble finishing set of reasons.
- 25-29pts has introduction of the class, tries to complete the reasons set but cannot, very nervous, forgets placings, very poor use of terminology, no structure for set of reasons, very unprepared.
- 20-24pts only gives a class introduction and placings but does so without the use of notes, almost no description of the class,
- 10-19pts read their notes at any point.
- 0-10 walk up and say they don't know what they are doing and walk away. (we hope this does not happen)
